

Humberto Maturana and Heinz von Foerster

Truth and Trust

2000

Three conversations between Heinz von Foerster and Humberto Maturana.

01 Truth and trust 25 minutes

What are we doing when we verify and when we validate a statement?

Does verification establish truth?

Is there a role for trust in science?

02 Future to be determined 25 minutes

The biology of cognition reveals that the student learns the teacher.

If this is the case, what must the teacher do to teach well?

What matters in education nowadays?

03 The matrix that embeds 25 minutes

We may look at objects or the relationships between them, but either implies making a distinction.

What is the ground from which we make distinctions?
