

## MYOFASCIAL RELEASE

AN ILLUSTRATIVE AND PHOTOGRAPHIC MANUAL

# Myofascial Release

Michael STANBOROUGH

This book provides a highly illustrated guide to direct release myofascial techniques (MFR) and their application in clinical practice. MFR is a manual therapy method that influences both a body's structural tissues and the sensory/motor systems. Originally developed by Dr Ida Rolf, the creator of the Rolfing® method, the approach has since been adapted and modified by different groups of therapists to fit within their own particular philosophies. This book strips away the surrounding theories and philosophies and focuses on the safe and appropriate use of the techniques themselves. Numerous photographs supplement the detailed, step-by-step coverage of techniques.
